

SPREUER CROSS

Class 5, Session B, Thursday 1:30-5:00

Designer: Doris Johnson

Instructions by: Dianne Ruff

Instructor: Dianne Ruff

Dianne Ruff grants full use of the project

Instructor's Comments: I found one of these crosses in my "Projects to Keep" box. I knew we had made this at one of the IAWW meetings years ago. After asking our members if they could remember where it came from, it was decided that it was one of Doris Johnson's classes that was taught at the Mennonite Heritage Center. Thank you, Doris, for all your wonderful ideas.

Skill Level: Open to all levels

Size of Project: 9" x 5" x 1/2"

Techniques: How to make a spreuer around six loose straws.

Suggested Wheat:

DO NOT SOAK STRAWS before coming to class. Bring 2nd joint rye straw.

Straws Needed:

12 2nd joint straws 8" long that are of medium thickness. It is important that these straws are all the same thickness and are not tapered.

4 fat straws at least 15" long. It is best if these are also 2nd joint to keep the spreuer even. These four straws will be split into 6 equal splints. You will need 21 split straws for the spreuers.

Other Supplies: thread, scissors, 6 fin straw splitter, straw scraper (Hindenburg), tacky glue

No Materials kit provided
